

You create documents – you don't create text or tables.

Be successful

The quality of your work is measured on the finished document. Reports, price lists, data analysis or sales and marketing materials are more than just text, spreadsheets and graphs. It is the combination of all of these elements which transforms text into a report and creates an informative analysis from a table.

Give your documents a new finish

So far you have made do without a layout program because you needed the capabilities of a spreadsheet or a word processor. Give

your work a new polish. With RagTime you get a layout tool for your office and an office tool for your prepress environment.

Working more productively
With RagTime you have word processing, spreadsheet, drawing, pictures and graphs in one clear layout environment. The intuitive user interface offers quick access to all program functions.

RagTime 6.6 Facts

RagTime 6 is the unique professional business publishing tool that combines the capabilities of word processing, spreadsheets, diagrams, images and drawings within a comfortable layout environment.

Seamless integration of all components

- Frames contain components like word processing, spreadsheet, pictures, graphs ...
- Editing of all components within a layout or in separate windows
- Exact position and transformation of all objects
- Calculation functions usable in spreadsheets, text, graphs, or user interface elements
- Rotation, scaling and skewing of all containers, including their contents
- Common spelling check in all components (text, spreadsheets, graphs, etc.)
- The individual items (pictures, text, spreadsheets, style sheets etc.) of the documents are clearly arranged in the inventory.
- Continuous transparency for pictures, text, tables, and other components

Text

- Optimal text rendering with anti-aliasing
- Footnotes, table of contents, index, drop caps
- Abbreviations for text blocks
- Multilingual hyphenation and spelling checking
- Support for OpenType, TrueType, and Type1 fonts
- Multiple columns
- Hyperlinks and cross references

Spreadsheets

- More than 200 functions
- Import and export of Excel worksheets
- Layout of complex tables with style sheets, images, etc.
- Three-dimensional spreadsheets with up to 16000 rows/columns/layers.
- Rotation of cells, unions of several cells
- Perfect typography within cells
- Continuation of tables across page or container boundaries

Pictures

- Picture acquisition via digital camera or scanner
- Cropping, scaling, free rotation
- Supported formats: JPEG, TIFF, EPSF, PDF, PNG, and BMP in RGB, CMYK, or LAB with ICC color profiles
- Placement of PDF pages as pictures

Graphs

- Gallery with more than 200 choices
- 2-d and real 3-d graphs with adjustable light and view points; pie, XY(Z), polar, ternary, spider charts; lines, symbols, balloons, error bars, candles; combinations of the types mentioned above
- Automatic update of graphs after spreadsheet changes

Output

- 4-color and spot color separation of RGB, LAB, and CMYK pictures, characters or drawing elements
- ICC color management for screen, proof or production printing
- Perfect export to HTML/CSS files
- Pin-sharp rendering of vector, EPSF or PDF data on screen and printer
- Serial printing (mail merge) with variable data including variable pictures or tables
- PDF export via Adobe Distiller, Ghostscript or Mac PDF converter

Miscellaneous

- Compatible with Windows and Mac, identical file format
- Foyer with easy access to most used documents and stationery pads
- Master layouts (page templates)
- Import and Export for Word, Excel, RTF, SYLK, DBF, JPEG, PNG, EPSF, TIFF, BMP, PICT, PDF and text.
- Editing in the print preview
- Standardized templates, stationery pads
- Grid lines, guide lines, rulers
- Context menus, custom keyboard shortcuts
- Adjustable screen resolution
- Full Unicode support, symbol palette
